Index

The page number refers to the beginning of a relevant contribution and boldface page numbers refer to volume two.

algebra
  Clifford, 403
  deformation, 255
  Heisenberg, 403
  superconformal, 177
algebraic
  curves, 403
  geometry, 255
  topology, 255
anti-de Sitter space, 177, 209, **3**
automorphic representation, 345

Bohr-Rosenfeld measurability, 99
Bott-Borel-Weil theorem, 309
BRST-cohomology, **45**

catastrophic risk, 81
category theory, 255
Cauchy problem, 389
classical limit, 189
coherent state, **131**
cohomological field theory, **145**
cohomology
  Čech, 217
  of nilpotent Lie algebra, 309
  sheaf, 309
coisotropic submanifold, **45**
configuration space, 255, **307**
crystal-field theory, **177**
cyclic cohomology, 121

deformation, 109, 255, **247**
  positive, **69**
deformation quantization, 31, 109, 157, 217, 255, **37**, **45**, **69**, **167**, **211**, **233**, **263**
Deligne conjecture, 255, **307**
diffeology, **185**
Dirac operator, 309, **25**
Drinfeld realization, **93**

effective lagrangian, **225**
equity allocation, 59
Euler number multiplets, 309

factor II_1, 149
Fedosov quantization, **37**, **45**
finite subgroups of SU(2), **177**
fixed-point manifold, 157
flavor symmetry, 209
Fock bundle, **167**
form factor, **247**
Frobenius manifold, **145**
functional
  determinant, **25**
  equation, 345

G-index, 157
G-trace, 157
Gerstenhaber algebra, **307**
Gromov-Witten invariants, **145**
Grothendieck-Teichmüller group, 255
ground state energy, 327
group
  action, 389, **333**
  symmetry, 157
Gupta-Bleuler triplet, **3**

handwriting recognition, 73
Hartree equation, 189
Higgs field, 209
Hochschild cohomology, **185**, **307**
holomorphy, 109
homogeneous space, **105**
homotopy algebra, **307**
Hopf algebra, 121
hyperfunction, **211**

information processing, 73
integrable
  hierarchie, **145**
  system, **263**

Kähler manifold, **167**, **289**
KdV-equation, **145**

L-function, 345
Lagrangian fiber bundle, **263**
Lie groupoid and algebroid, **333**

linearization, 389, **333**
loop space, **185**

Maass forms, 345
Manin pairs and triples, **105**
masslessness, **3**
Maxwell-Dirac equations, 389
modular duality, 149
moduli space, **145**, **307**

neutrino oscillation, 209
noncommutative geometry, 121, **233**
nonlinear representation, 389
nonlinear wave equation, 389

operad, 255, **307**
option pricing, 81

perturbation expansion, **257**
point-particle limit, 189
Poisson structure, **333**
Poisson-Lie group, **37**, **105**
portfolio selection, 59

q-fields, **123**
qKZ-equation, **247**
quantization, **131**, **211**, **289**
  with separation of variables, **167**
quantum
  affine algebra, **93**
  algebra, 255
  anomaly, **225**
  chromodynamics, **225**
  control, **199**
  electrodynamics, 327
  field theory, 403, **123**
  group, 121, 149
  macroscopic body, **199**
  measurement, 99
  superalgebra, **93**
  theory, 189
    foundations of, 99

radiation, 327
reciprocity law, 403
renormalization scheme, **257**
replica, **247**
representation
  nonlinear, 389
  spin, 309
  theory, 309, 345, **3**

risk management, 59

scattering, 389
Schrödinger's paradox, **199**
semi-martingales, **185**
Serre relation, **93**
sheaf, 109, 309
singleton, 31, 177, 209, **3**
soliton, 189
star-product, 109, 157, **37**, **289**
  convergence, 217, **211**, **233**
superconformal field theory, 177
supersymmetry, 177
symmetric space, **81**

time distortion, **199**
Toeplitz operator, 109, **289**

ultraviolet cutoff, 327

value at risk, 59

Ward identities, 403
wave packet, **131**
Wigner-Racah algebra, **177**

zeta-function regularization, **25**
